

Press release Calendar Week 48/I

Skis on the rooftops Rameder have whatever you desire

From one to six pairs of skis – with the right ski rack you can carry them wherever you want. But there is so much out there to choose from that it's hard to find the right product. At www.rameder.eu, however, the online shop run by **Rameder**, Europe's market leader when it comes to automotive transport solutions, you will be provided with tips and get renowned manufacturers' models.

Given their length, skis are usually put on a car's roof. After all, they may well be up to 2m long and won't fit inside. For safety reasons – that is, to protect skies from getting loose – you should opt for specially designed racks. Heed the following tips when selecting a roof rack and the right ski rack.

First check if your car has open, closed or no roof rails because many ski racks require a roof rack. You will find the suitable model when entering your car's data in the right [category](#). But there are also models with a magnetic mount which don't require any accessories. Thanks to the parameters you can apply, you will soon find the right one.

For people who spontaneously want to go skiing, for example, **Rameder** has the [magnetic ski rack Himalaya](#) for €75. This is for two pairs of skis incl. ski poles and it's lockable. You will have it affixed with magnets in no time and without tools. For others, **Rameder** has the [White Bear 4 ski rack](#) (€44.99). This will be affixed to a roof rack and carry four pairs of skis or two snowboards.

But the online shop at www.rameder.eu has a lot more for you. Check it out!
