Small but strong

Rameder towbars for the MINI Clubman and Ford Fiesta VI

If you think B- and C-segment cars mean little space, you are wrong. Not only are they perfect for cities, they can achieve great things. **Rameder** has the right towbar for the MINI Clubman and the Ford Fiesta VI and many accessories to “survive” in the inner-city jungle. In its shop at www.rameder.eu you will find many transport solutions for these small but versatile cars.

People who don't want to spend a lot on a car for short and medium distances and don't have to carry a lot with them often opt for a small car. But these compact solutions also often provide many an opportunity for transportation. **Rameder**, Europe's market leader when it comes to towbars and transport solutions, has the right towbars for [bike carriers](#) and trailers for B- and C-segment cars.

A very popular model in this segment is the Ford Fiesta VI. It is particularly suitable for city traffic due to its compact dimensions. **Rameder** has a detachable towbar (including electrical kit for 254,99 €) with a vertical load of 50 kg and a trailer load of 900 kg available as well as a rigid model for 170,99 €. For the MINI Clubman (F54) **Rameder** offers different detachable towbars including electrical kit. For example, the model with a trailer load of 1500 kg and a vertical load of 100 kg for 324 €.

All towbars can be used for mounting a bike carrier. The bicycles can now be transported directly in the lee of the car and can be loaded and secured without much effort. This makes the small cars the perfect companion for nature trips. Be it in summer or winter, in the city or in the country: thanks to **Rameder** city cars can be turned into real transporters. Check out www.rameder.eu for many an automotive product in many a category.
