

## Press release Calendar Week 07/I

### With Himalaya and Co. in the Alps Two practical and versatile ski racks from Rameder

Be it an extended winter holiday or a day trip to the ski run, without the right ski rack, the transport of the equipment is not just tricky, but also dangerous. Because solely the adequately mounted ski and snowboards do not represent any risk when transported by a car. If you are looking for a suitable ski rack, head to **Rameder** at [www.rameder.eu](http://www.rameder.eu). The online shop of the European market leader for towbars and automotive transport solutions offers numerous models that meet a wide range of requirements.

For spontaneous friends of winter sports, particularly recommended are the ski racks with magnetic holder. The [Himalaya](#) model (EUR 75.00) can be attached in just a few seconds and without the need of any tools. Needless to say, the two pairs of skis are adequately secured, and nothing happens to the cars roof thanks to the plastic coating of the magnetic surfaces.

Although the model [Frozen Alu](#) (EUR 68.99) requires an additional [Roof racks](#), the carrier's entire 51cm-wide surface allows the transport of up to five pairs of skis or two snowboards. Perfect for a ski holiday with family or friends.

Supplementary, the **Rameder** Online-Shop at [www.rameder.eu](http://www.rameder.eu) offers many other transport solutions for cars. Thanks to easy-to-find categories and the practical search function, the ideal product for almost any challenge is easy to find. A visit is well worthwhile!
