

## PRESS RELEASE WEEK 46/I

### No more cumbersome loading

#### Rameder presents rear carrier for folding wheelchair

Secure storage and easy transport for car journeys are essential for wheelchair users. The convenient **Allround rear carrier** now makes this possible – it can be mounted directly on the towbar in a few simple steps. In the Rameder online shop [www.rameder.eu](http://www.rameder.eu), the system is available, including 13-pin connector.

The high quality **Allround rear carrier** with TÜV/GS approval for a folding wheelchair allows easy installation on the vehicle towbar. Additional features are the user-friendly operation, the space saved inside the vehicle and no dirty wheels in the trunk. If the user changes the car or wants to ride with friends or family, the rear carrier can simply be transferred – it only requires a towbar with a 13-pin socket. The clever design allows this stainless light alloy model to be mounted on the towbar in no time at all, using a clamp and stabilizing sleeve. The wheelchair can be attached to the transport platform (dimensions: 930 x 360 mm) easily and securely, with an appropriately high load rating of 60 kilograms.

Drivers can conveniently order this sturdy carrier system, a matching towbar and the corresponding accessories, such as theft protection or a third brake light, in the **Rameder** shop at [www.rameder.eu](http://www.rameder.eu).
